

Step-by-Step Guide to Designing the HackerRank Login Page in Figma

1. Introduction

This guide provides a detailed, step-by-step approach to designing a HackerRank login page using Figma. It covers creating a new project, setting up the layout, adding UI components, and finalizing the design to ensure a professional and user-friendly interface.

2. Prerequisites

Before starting, ensure you have:

- A Figma account (free or paid).
- Basic knowledge of Figma tools such as Frames, Shapes, Text, and Auto Layout.

3. Steps to Design the Login Page

Step 1: Create a New Project

1. Open Figma and log in.
2. Click on **New File** to create a new design project.
3. Rename the file to "**HackerRank Login Page**" for easy reference.

Step 2: Set Up the Frame

1. Press **F** (shortcut for Frames) and select an appropriate frame size:
 - **Desktop:** 1440x1024 px
 - **Mobile:** 375x812 px
2. Rename the frame to "**Login Page**" in the Layers panel.

Step 3: Add Background & Logo

1. Set the background color to **#FFFFFF** (white) or match HackerRank's theme.
2. Import the HackerRank logo:
 - Go to **File > Place Image** and insert the logo.
 - Alternatively, draw a rectangle and apply an image fill.
3. Position the logo at the **top center** of the frame.

Step 4: Create the Login Form

Email Input Field

1. Draw a rectangle (**R**) for the input field.
2. Set dimensions to **300x50 px** with a border-radius of **8 px**.
3. Add a placeholder text: "**Enter your email**" using the **Text (T)** tool.

Password Input Field

1. Duplicate the email field (**Ctrl/Cmd + D**).
2. Change the placeholder text to "**Enter your password**".
3. Add an **eye icon** for password visibility toggle.

Login Button

1. Create a button using a rectangle with dimensions **300x50 px**.
2. Set the button color to **#2EC866** (HackerRank's green theme).
3. Add the text "**Login**" in white, centered inside the button.

Forgot Password & Sign-Up Links

1. Add two text elements below the login button:
 - "**Forgot Password?**"
 - "**Sign up**"
2. Apply **underline styling** to indicate clickable links.

Step 5: Align & Group Elements

1. Use **Auto Layout (Shift + A)** to align elements properly.
2. Group related elements (e.g., input fields, buttons) for easier adjustments.

Step 6: Prototyping (Optional)

1. Switch to **Prototype mode** and add interactions:
 - Set the **Login button** to navigate to the next screen (if applicable).
 - Link the **Sign-Up** and **Forgot Password** texts to new frames.

Step 7: Final Touches & Exporting

1. Check spacing and alignment using **Shift + R** (Rulers and Grids).
2. Preview the design by clicking **Present**.
3. Export the design:

- Go to **File > Export**
- Save it as **PNG, JPG, or SVG**.

4. Conclusion

By following these steps, you can successfully create a structured and visually appealing HackerRank login page in Figma. This guide ensures clarity in UI design, making it easy to modify and enhance as needed.
